NOTE FOR D/DCI/IC

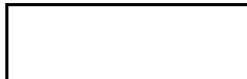

The attached rather elderly memo is one that the DCI has just recently read and which he asked be made available to you. It will be of particular importance to the new Agency Deputy, whoever that will be.

The memo makes some fairly interesting points, more philosophical than practical, and it raises some problems that have not been entirely resolved in CFI circles as yet.

As the senior intelligence honcho in DoD, Ellsworth would probably be more comfortable in being the advocate rather than the judge in CFI sessions.

The very last point made in the memo, however, does seem to have been overtaken by events. As you know, so far the IC Staff gives a common briefing to all CFI principals prior to each meeting. This must continue so that we do not come up with CFI principals who are staffed separately and come to meetings with logger-heads' positions.

E. H. Knoche
